

Getting a driver's license requires passing a test and a driving demonstration - a competency-based system utilizing multiple forms of assessment. Professional certification for doctors, accountants and lawyers rely on test-based demonstrations of competence. We can all think of examples - from professional licensure to video games - where we must show what we know to demonstrate achievement. Why then should the education system be any different? Moving to a competency-based education system is the logical evolution from the outdated factory model to one that can personalize learning and serve the needs of each individual student. From the future doctor entering med school to the future pilot logging flight hours, a system based on competency also has the best potential to improve college and career readiness.

why competency?

what is competency education?

A system of education, often referred to as proficiency - or mastery - based, where students advance upon mastery. Compétencies include explicit, measurable, transferable learning objectives that empower students. Assessment is meaningful and a positive learning experience for students. Students receive timely, differentiated support based on their individual learning needs. Learning outcomes include application and creation of knowledge, along with the development of important skills and dispositions. (Source: CompetencyWorks.org)

what's wrong with the current system? Batch processing students by birthday is ineffective and inefficient today.

of skills, but are grouped by birthday.

1st graders have a wide range

Students are promoted when not ready; strugglers start

leaving in middle grades.

3rd graders get the same instruction for the same time;

some get it, some don't.

and graduation rates.

The result is low proficiency

year old

doing 6th and 7th grade work

There is an incredible opportunity to build a new system focused on student learning—schools where students learn in the best way possible for them, where there are different ways to learn, where the day and year are extended, and where students show what they know on a regular basis.
