

DEEPER LEARNING

MAKING EVERY STUDENT & TEACHER A SUPERHERO, EVERY DAY

Adopting college and career ready standards and shifting to the next generation of assessments presents an unprecedented opportunity to create schools that work better for students and teachers. Now is the time to reconsider learning goals, pedagogical models, and the basic structure of our learning institutions in order to promote Deeper Learning at scale.

WHAT IS DEEPER LEARNING? Deeper Learning ensures that students master core academic content, think critically, solve complex problems, work collaboratively, communicate effectively, direct their own learning, and develop an academic mindset.
